

Notes:

- 1) Each leg of each diode bridge is minimum 50A
- 2) The a.c. (~) connections of the bridge are not used
- 3) This circuit is inserted in the ground wire of the three-wire mains cable
- 4) A fuse link or circuit breaker, equal in value to the diode rating in Amps, must be inserted in the live wire
- 5) The bridges must be bolted to a suitable metal surface
